Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6 and 103-109, drawn to a bacterial effector protein, and a method of using it.

Group II, claim(s) 7-102, drawn to a polynucleotide encoding an effector protein, construct/vector, plant cell, and a plant transformation method.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The inventions I and II are directed to structurally and functionally different products and different methods of using said different products. The only possible technical feature between the groups is that the effector of protein may be encoded by a polynucleotide of Group II. However, the fact that polynucleotide encode polypeptide is known in the prior art and does not constitute a contribution over the prior art. Therefore, there is no special technical feature that links the invention of Group I with the invention of Group II.

Furthermore, the special technical feature of Group I that is not recited in Group II is considered to be the isolated protein.

The special technical feature of Group II that is not recited in Group I is considered to be nucleic acid and transgenic plants comprising it, and a plant transformation method using vectors.

Therefore, for all the reasons discussed above, inventions I-II lack unity.

Applicant is advised that the reply to this requirement to be complete must

Art Unit: 1638

include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
